ABOUT BACKSAVER

WORK HARD LIFT SMART

Backsaver has been specialised in the production of top quality stainless steel lifting and tipping machines for the food industry since 1990. Machines which are simple to use and which result in an optimal production line and healthy employees.

Backsaver forms part of the Van Oirschot Roestvrijstaal BV family business, founded in 1948. Our company specialises in customised stainless steel. We have gained extensive experience in the production of lifting and tipping machines for over 30 years. We created a separate brand in the early nineteen nineties, after realising there was a huge need for these types of machines: Backsaver.

IT IS OUR MISSION TO BUILD HIGH QUALITY STAINLESS STEEL LIFTING & TIPPING MACHINES FOR THE FOOD INDUSTRY. MACHINES WHICH ARE EASY TO USE, IMPROVE AND SPEED UP YOUR PRODUCTION AND SAVE YOUR EMPLOYEES' BACKS.

The design and manufacture of the Backsaver lifters and tippers is completely done in-house. We have our own engineering, design and production department. Working with a close and involved team means the lines are short and everyone works in a purposeful and efficient manner.

Our company is characterised by personal attention. We have a flexible attitude and will always think along with you. Our aim is provide you with quality and make sure you feel ultimately satisfied when using our machines. And this is evident in how we run our business. The customer and end user are always central focus points for us.
